Suggestions

Overall, this project was successful, but here are some suggestions for further improvement.

1. Adding products – currently there are no products in the page. This would have helped in testing out the page and some of the other features.

2. Implementing “booking the campsite” feature – cool feature seen in the wireframes but did not end up in the final project.

Two minor fixes for the user experience

1. Adding invalid card details – *This would cause confusion for the user, as they may not realise that the card details are invalid, which could lead to problems during checkout.*

2. Contact Us form - *Adding a confirmation message when the message has been submitted successfully.*
